A small nice citation from [1]:
A bird cannot land once on a great tree and claim to know it. But I imagine that he would, yes.

Iain M. Banks (1993), *Against a dark background.*

Second chapter, starred

This is a starred chapter; you can test here variations on the `\mtcaddchapter` command. Just uncomment one (and only one) of the `\mtcaddchapter` commands after `\chapter*` in the source code of `mtc-add.tex`. For each case, look at the Table of Contents and at this chapter. I also added a lot of index entries, just to test.
